

Milk Bags Mats

Mats for Third World Countries

Milk bags (the outer milk bag that contains 3 milk bags) can easily be discarded and yet they can be used for something more. The bags are crochet into mats for people to sleep on in third world countries. The bags, being plastic, are resistant to mould, bacteria, and keep insects at bay. It takes approximately 200-250 bags (may take more bags depending on the size of the mat) and 40 hours for one person to create one mat. We need your help to create more mats, so please collect milk bags (keep them flat for easier smaller transportation) and make sure we get them, otherwise they will go to landfills.

For information on where to send the bags or any other questions please email me at missvperreault@gmail.com. Thank you for your help! Joliette High School.
