# Procedure for Adding a Proof of Vaccination in the VaxiCode App

Download your most recent proof of vaccination containing the QR code and then download the VaxiCode app.

STEP 1

On first use, the app automatically redirects you to a welcome screen.
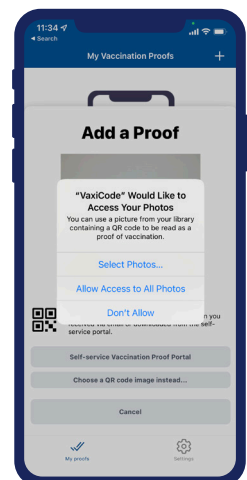

Press "Next" to continue.

Welcome to VaxiCode
The app lets you register your proof of COVID-19 vaccination issued by the Gouvernement du Québec.

→ Next

STEP 2

On first use, the app asks for permission to access your phone's camera.

Press "Allow" or "OK" to agree and continue.

Permission required
VaxiCode needs your authorization to access your camera and digitize your proof of vaccination.
✓ Allow

"VaxiCode" Would Like to Access the Camera
Your camera is used to read vaccination proof QR Codes.
Don't Allow   OK

Save this proof

If the birth year is valid, the proof of vaccination will appear on screen. If the proof of vaccination is not the one you want to save in the app, press "Scan another proof" and start over.

If this is the proof of vaccination you want to save in the app, press "Save this proof."
STEP 5

The app will automatically direct you to the list of saved proofs of vaccination.

→ To save a new proof of vaccination, press the "+" symbol on the upper right-hand side of the screen.

STEP 6

If you have not yet saved a proof of vaccination, press "Add a proof" or the "+" symbol on the upper right-hand side of the screen.

STEP 7

If the proof of vaccination is valid, a banner screen will appear with the user's name.

If the proof of vaccination is invalid, a red banner will display with the user's name.
How to manage a QR code saved in your phone's photos

STEP 1

To add a proof of vaccination using an existing image on your phone, press "Choose a QR code image instead".

Add a Proof

Scan your proof of vaccination.
You can scan an existing proof of vaccination you received via email.
