## Addition of School Transportation Information in Clic École

It is now possible to display transportation information in the **Clic École** mobile application.

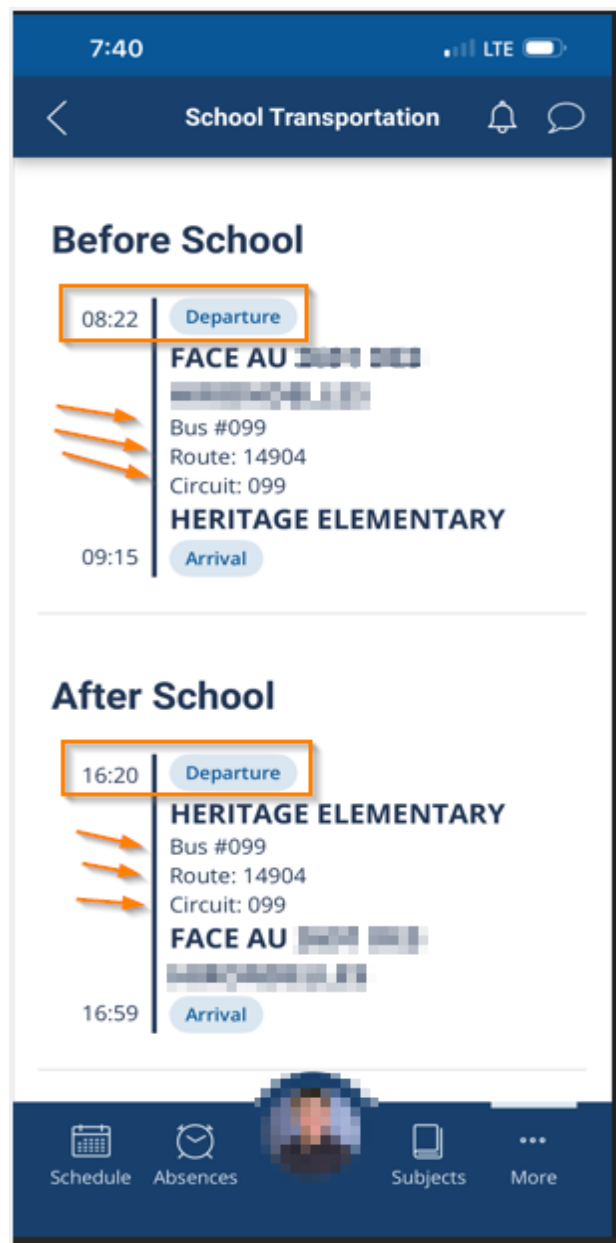

School transportation information can be accessed from the **More** button on the bottom menu bar of the application, then under **Student > School Transportation**.

Parents will be able to view the following information:

- Information for all transportation periods
- Departure and arrival times
- Departure and arrival addresses
- Bus number, route number, and run number

If a transportation notice has been generated in **Géobus**, it will appear in the **Transportation Documents** section.

If the student is not using school transportation, an informational message will be displayed to the parent.

**No transportation information is currently available.**
